

Learn RFID technology and how to benefit from it in this powerful, interactive, Web-based learning experience. Speed your deployment and ROI.

RFID Revolution[®]

People learn best by *doing*—not by hearing or watching. Developed by top industry experts, **RFID Essentials** is the first and only “virtual workshop”—an active experience in which users practice what they’re learning in engaging, simulated applications. In hours, project team members acquire the knowledge and skills to advance their organization’s RFID initiatives. And they do it on their schedule, from the office or home.

RFID Essentials provides a comprehensive, vendor-neutral introduction to RFID. It’s ideal for information technology, operations, engineering, and finance professionals in end-user companies who want to quickly familiarize themselves with RFID technology without spending days or weeks sitting in a classroom. You can acquire the working knowledge needed to:

- Identify the most promising applications
- Select the right RFID architecture for each application
- Talk more knowledgeably with vendors
- Implement appropriate measurements that demonstrate a project’s contribution
- Speed your organization’s implementation and return on investment

RFID Essentials improves comprehension and retention with visually rich, interactive exercises; imaginative animations; learner-controlled audio narration; text, graphics, and video; and an optional, online discussion forum with the course instructor.

You can complete the entire course, including its optional final exam, in about eight hours, **or** subscribe to component modules most relevant to your objectives. Enterprises can license the course for a year, so their users can review as often as they wish.

Taste the difference! Test drive RFID Essentials at www.rfidrevolution.com.

The course enabled Peter Khademi, President of Irvine, California-based RFID International, to jumpstart his new business:

“I thought it was superb—unlike any technology training I’d ever had. It’s chock full of great content and I could go at my own pace. What I liked best were the virtual workshops that gave me an opportunity to test my understanding. I’m recommending this course to my international associates.”

-Over-

RFID Revolution developed Course 1 in collaboration with three of the industry's most distinguished experts:

Dr. Dan Dobkin, Enigmatics (center)
Craig Harmon, Q.E.D. Systems (right)
Louis Sirico, RFID Wizards (left)

Topics covered include:

- Overview of automatic identification technologies
- RFID technology and standards (active and passive; hardware and software)
- Marketplace and trends
- Applications, including more than 20 examples of applications delivering ROI
- Implementation in the enterprise
- Business value and how to measure it
- Data security techniques and privacy considerations

Certificates: *RFID Essentials* features a non-mandatory final exam lasting from 60 to 90 minutes that provides feedback on your answers and may be taken up to three times (slightly varied versions). Two types of course certificates are offered to learners passing the exam: a *Certificate of Completion of RFID Essentials*, for passing the “Basic” questions; and a *Certificate of Mastery of RFID Essentials*, for passing the optional, “Advanced” questions.

CompTIA RFID+ Certification: Combine *RFID Essentials* Course 1 for thorough understanding of fundamentals with CompTIA RFID+ Study Guide by Patrick Sweeney (paperback and CD, available from Amazon.com) for efficient and effective exam preparation.

Subscriptions:

- *Individuals:* Subscribe to Course 1 *or* component course modules. Consult our website for pricing. Subscription period is 60 days following registration.
- *Enterprises:* One-year license with group pricing.

PC configuration requirements (obtain details on how to make changes on course registration site):

- Browser: Microsoft Internet Explorer version 6 or higher; Firefox version 1.5 or higher; or Safari for Macintosh version 1.x or higher
- At least a 56K modem connection; broadband connection recommended
- Adobe Flash Player: Version 7.0 or higher (www.adobe.com)
- Display resolution set to 1024 x 768 or greater
- Pop-ups, cookies, and javascript must be *enabled*.
- Ear phones or ear buds advised for those taking course in close proximity with others

Technical support: Assistance with registering, accessing, and navigating the course is provided via phone and e-mail, Monday through Friday from 9 a.m. to 5 p.m. U.S. Eastern Time.
